

Shallow Flexible Mica Fire Enclosure for recessed fixtures

Features

- Fire Enclosure provides fire barrier around recessed lights. It also can be used as vapor barrier for other openings.
- Can be installed before or after recessed fixture installation.
- Easy installation reduce labor costs significantly.
- 2" wide nailing flange on all sides.
- To be used with Mica tape (FIRETAPE sold separately) to seal the power feeding point.
- ETL approved 1 hour fire rating.
- Fits in 2x8 construction.
- Install easily with drywall screws with flat washers, nails or staples.
- Meets the specifications of: UL 263, ASTM E119.
