The **Cedar System**

EL **ELCO Lighting**
The Best Choice in Lighting

The Cedar System

ELCO Lighting Cedar System was designed as a high output LED Downlight for High-End Residential and Light Commercial applications for IC and Non-IC conditions. This architectural grade downlight system is offered in apertures of 4" to 6" in baffle, reflector, wall wash, adjustable and square. The Cedar System ranges from 2700K to 4000K for 850 lumens to 2000 lumens.

Introducing The Cedar System

ELCO Lighting vision behind The Cedar System was to create a full offering of high output LED downlights for High-End Residential and Light Commercial applications, for IC and Non-IC conditions. This architectural grade downlight system is offered in apertures of 4" and 6" with lumen outputs from 850 lumens to 2000 lumens, and color temperatures ranging from 2700K to 4000K.

The Cedar System Housings are standard in 120-277V with dimming for Triac, ELV and 0-10V and are available for New Construction or Remodel applications. Our LED Light Engines are also available with round or square baffle, reflector or wall wash trims in a variety of color finishes making them the perfect choice for any project design.

Understanding **CRI** (Color Rendering Index)

70 CRI

80 CRI

90+ CRI

Color Rendering Index (CRI)

Color rendering is the effect of a light source on the color appearance of an object by comparison to a reference light source. The color rendering index (CRI) is a quantitative measurement of the ability of a light source to reveal or render the colors of various colors realistically in comparison to an ideal or natural light source. The CRI scale is 1 to 100 with higher numbers

indicating more realistic rendering of targeted colors. Lower CRI numbers, below 70 CRI tend to render weak or distorted colors. The current standard in the market is in range of 80 CRI; however, all of our Cedar systems have a CRI of 93+ making them perfect for rendering colors brilliantly and with great accuracy.

Color **Temperature**

2700K

3000K

3500K

4000K

5000K

Color Temperature

The Correlated Color temperature (CCT) rating of an LED lamp indicates the relative 'warmth' or 'coolness' of the appearance of white light generated by the lamp. Color temperature is expressed in degrees Kelvin (K). Generally speaking, color temperatures 3200K and below are considered to be 'warm' and therefore are a slightly more yellowish white, and color temperatures above 4000K are considered 'cool' and therefore are a slightly more bluish white. A light source with a color between 2700K and 3000K are most appropriate for residential applications or as an incandescent or CFL replacement. A light source with a color temperature

between 3200K to 3500K would be considered to be bright white and are appropriate in residential and light commercial applications such as boutique retail, classrooms and hospitality venues. A light source with a color temperature 4000K and above are ideal for any commercial application including big box retail, electronics stores, industrial and technical manufacturing where superior visibility is essential to shopping, production and security.

Ambient Lighting

Ambient lighting describes the main source of illumination in a room or space and it provides a wide area of general lighting. Sources of ambient lighting include windows, skylights and centrally located ceiling elements, such as chandeliers, fans and recessed fixtures.

Luminous Flux

Luminous flux describes the unit flow of light. Lumens is the unit of measure that quantifies the flow of light from a lighting fixture or lamp. For example, if the light source claims 1000 lumens (Lm) it is the measure of the total light output of that device. The higher the lumen rating, the more light that is produced by the light source.

Accent Lighting

Accent lighting refers to a directional luminaire such as a track head that can be aimed to highlight an object or space. Track heads are very popular lighting for retail displays, hospitality venues such as night clubs, restaurants, and grocery store produce sections.

Wall Washing

Wall washing in lighting, describes the direct effect created by a light beam at an angle towards a wall or other structure to highlight that wall or an object that has been placed on or near the wall such as an art piece. Wall wash luminaires may be adjustable and can be used to graze a wall to highlight grain, texture or structure.

Efficacy

Efficacy is a metric used to compare light output (lumens) to energy consumption (watts). If a luminaire delivers 3000 lumens and consumes 30 watts then the efficacy would be 100 lumens per watt: $3000\text{Lm}/30\text{W} = 100\text{LPW}$. The current standard efficacy in the market ranges from 60LPW to 100LPW compared to that of a traditional incandescent light bulb, which is roughly 15LPW.

Lumen Depreciation

Lumen depreciation (or lumen maintenance) compares the amount of light produced initially from a light source to the amount of light output at a specified time in the future. If a new luminaire produced 1,000 lumens of light and now produces 700 lumens after 50,000 hours, then it has lumen maintenance of 70 at 50,000 hours.

What is **Sunset Dimming**?

ELCO Lighting's Sunset Dim technology was designed as the perfect lighting product for hospitality applications as it allows for a well lit room when not dimmed and creates a warm, rich feel when dimmed. Sunset Dim has been designed to allow for a radiant 2700K dimmed down to a comfortable 1800K to mimic the incandescent predecessor. Sunset Dim can be used to enhance the mood of a space by bringing a sense of intimacy and comfort; imagine the romance of warm candlelit dinner with the relaxing sensation of a summer sunset brought to life using the most modern and energy efficient technology.

How does it **work**?

This product was designed by using multiple color temperature LED chips, each dimmed precisely to create a smooth, warm dim. The product starts at a radiant 2700K and is smoothly dimmed to a warm 1800K.

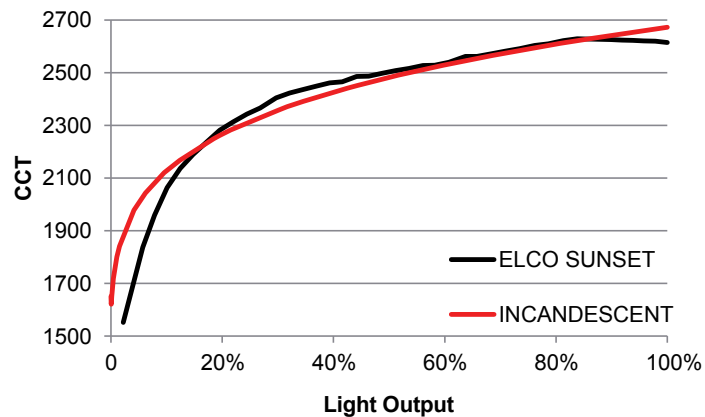

2700K

Dims to

1800K

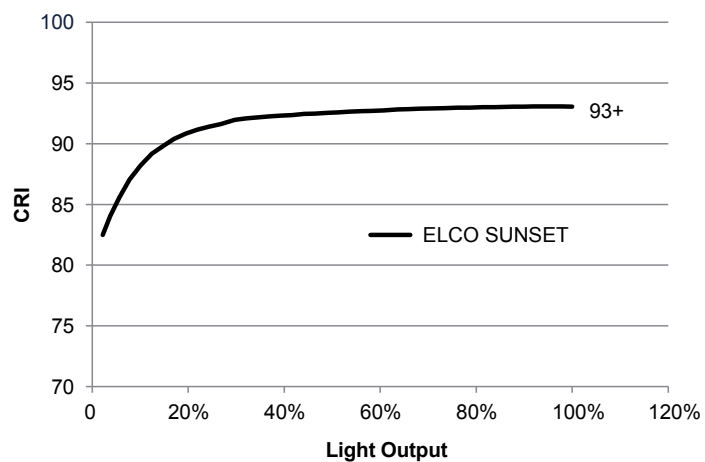

ELCO Sunset vs. Incandescent

Sunset Dim was designed around the natural dimming of a standard incandescent lamp. Although this product follows the incandescent we wanted a smoother, warmer and more balanced dimming experience, this technology achieves just that.

ELCO Sunset CRI

One of the most difficult design challenges when creating a Sunset Dimming LED array is maintaining a high CRI as the product dims. Many other technologies start between 70 and 80 CRI and quickly drop below 60 CRI as the product is dimmed. ELCO's Sunset Dim product line keeps at a steady 93+ CRI from 25 percent to 100 percent lit and as the product dims below 25 percent it stays above 83 CRI.

TITLE 24 COMPLIANT

- UL Listed for 2-Hours Fire Resistance to meet and exceed strict fire safety codes
- Integrated Non-Combustible insulation acts as a sound barrier minimizing sound transfer between floors
- UL Listed for direct contact with insulation
- Height allows for use in 2 x 8 Construction
- 3 in 1 Dimming 120/277V, Triac (120V only), ELV and 0-10V (1-100%)
- Optional 90 minutes, 120/277 VAC, 60Hz. Emergency Backup
- Captive Hanger bars span up to 24" and can be repositioned 90°
- Accommodates ceilings up to 1 1/2"
- Meets restricted airflow requirements (per ASTM E-283)
- Meets Title 24 requirements
- High Power Factor (≥0.95), Class 2 Driver on housing
- Special order with Lutron® EcoSystem 5-Series & H-Series Drivers
- USA Designed and Assembled
- Limited 5 Year Warranty
- For use with 4" LED Light Engine

Trimless Cedar System Engines

The Trimless Cedar System is the seamless design choice in recessed lighting. Designed to seamlessly make the trim ring invisible showing only the reflector and lens, it slides in and out of a finished ceiling without the aid of any tools. The product was designed with a well-engineered spackle frame for easy mudding and lasting quality. A favorite lighting fixture for high-end residential as well as architectural spaces.

6" New Construction 2-Hour Fire Rated Housing w/Driver

2-Hour Fire Rated for use with Cedar System LED Light Engines

TITLE 24 COMPLIANT

- UL Listed for 2-Hours Fire Resistance to meet and exceed strict fire safety codes
- Integrated Non-Combustible insulation acts as a sound barrier minimizing sound transfer between floors
- UL Listed for direct contact with insulation
- Height allows for use in 2 x 8 Construction
- 3 in 1 Dimming 120/277V, Triac (120V only), ELV and 0-10V (1-100%)
- Optional 90 minutes, 120/277 VAC, 60Hz. Emergency Backup
- Captive Hanger bars span up to 24" and can be repositioned 90°
- Accommodates ceilings up to 1 1/2"
- Meets restricted airflow requirements (per ASTM E-283)
- Meets Title 24 requirements
- High Power Factor (≥ 0.95), Class 2 Driver on housing
- Special order with Lutron® EcoSystem 5-Series & H-Series Drivers
- USA Designed and Assembled
- Limited 5 Year Warranty
- For use with 6" LED Light Engine (850 - 2000 lumen)

Input Power	10.5W - 24.5W

6" Remodel Housing with Driver

Non-IC Airtight remodel housing for residential and light commercial, 850 to 2000 lumen

TITLE 24 COMPLIANT

- Height allows for use in 2 x 8 Construction
- 3 in 1 Dimming 120/277V, Triac (120V only), ELV and 0-10V (1-100%)
- Optional 90 minutes, 120/277 VAC, 60Hz. Emergency Backup
- Accommodates ceilings up to 1 1/2 "
- Meets restricted airflow requirements (per ASTM E-283)
- High Power Factor (≥0.95), Class 2 Driver on housing
- Special order with Lutron® EcoSystem 5-Series & H-Series Drivers
- USA Designed and Assembled
- Limited 5 Year Warranty
- For use with 6" LED Light Engine (850, 1250 and 2000 lumen)

Input Power	10.5W - 24.7W
Lumens	850 - 2000
Input Volt	120/277V AC
Power Factor	≥0.95
Input Frequency	50/60 Hz
Dimmable	Triac/ELV/ 0-10V
Wet Location	UL listed
Feed Through	UL listed

3-in-1 Dimming Remodel Housing

Cedar System LED Module with Driver for Existing Housings

Cedar System LED Module with Driver is designed to be used in either existing installed housings or with ELCO's dedicated LED housings. This line is available from 2700K to 4000K in 4" and 6" apertures up to 1250 lumens. The driver is pre-installed above the LED module for easy installation. These inserts are a great way to add high-end lighting to a ceiling with existing housings.

4" Dedicated LED ICA Housings

TITLE 24 COMPLIANT

EL49FICA

4" New Construction 2-Hour Fire Rated IC Housing

- UL Classified to maintain fire ratings up to two hours
- For use in insulated ceilings
- For use in 2 X 8 construction
- Integrated non-combustible insulation enhances acoustical protection, dampening sound transfer between floors
- Adjustable housing accommodates up to 1-1/2" ceiling thickness
- Housing meets restricted air flow requirements (per ASTM E-283)
- 2-wire quick connect terminal connector
- UL Classified 2 Hour Fire Rating
- UL listed for damp locations
- UL listed for wet locations (with specified trims)
- UL listed for through branch circuit wiring
- UL listed for direct contact with insulation

Input Voltage 120/277V

Input Power 14W MAX.

EL490ICA

4" IC Airtight New Construction Housing

- Single Wall IC Rated for use in insulated ceilings
- Housing with quick connect for easy insert installation
- Meets restricted air flow requirements (per ASTM E-283)
- Captive hanger bars span 24" can be repositioned at 90°
- Height allows for use in 2 x 6 construction
- Adjustable housings accommodates up to 1 1/4" ceiling thickness
- UL listed for damp location
- UL listed for wet location (with wet location inserts)
- UL listed for feed through
- UL listed for direct contact with insulation
- CA Title 24 compliant (as high efficacy luminaire)

Input Voltage 120/277V

Input Power 14W MAX.

EL490RICA

4" IC Airtight Remodel Housing

- Single Wall IC Rated for use in insulated ceilings
- Housing with quick connect for easy insert installation
- Meets restricted air flow requirements (per ASTM E-283)
- (4) Remodel clips secure housing
- Height allows for use in 2 x 6 construction
- Adjustable housings accommodates up to 1 1/4" ceiling thickness
- UL listed for damp location
- UL listed for wet location (with wet location inserts)
- UL listed for feed through
- UL listed for direct contact with insulation
- CA Title 24 compliant

Input Voltage 120/277V

Input Power 14W MAX.

4" LED Module & Driver with Reflector Trim

The perfect lighting solution for high-end residential projects with existing housings

6" Dedicated LED IC Housings

TITLE 24 COMPLIANT

EL76FICA

6" New Construction 2-Hour Fire Rated IC Housing

- UL Classified to maintain fire ratings up to two hours
- For use in insulated ceilings
- For use in 2 X 8 Construction
- Integrated non-combustable insulation enhances acoustical protection, dampening sound transfer between floors
- Adjustable housing accommodates up to 1-1/2" ceiling thickness
- Housing meets restricted air flow requirements (per ASTM E-283)
- 2-wire quick connect terminal connector
- UL Classified 2 Hour Fire Rating
- UL listed for damp locations
- UL listed for wet locations (with specified trims)
- UL listed for through branch circuit wiring
- UL listed for direct contact with insulation

Input Voltage	120V
Input Power	22W MAX.

EL770ICA

6" IC Airtight New Construction Housing

- Single Wall IC Rated for use in insulated ceilings
- Housing with 2-Wire quick connect for easy insert installation
- Meets restricted air flow requirements (per ASTM E-283)
- Captive hanger bars span 24" can be repositioned at 90°
- Height allows for use in 2x8 construction
- Adjustable housings accommodates up to 1 1/4" ceiling thickness
- UL listed for damp location
- UL listed for wet location (with wet location inserts)
- UL listed for feed through
- UL listed for direct contact with insulation
- CA Title 24 compliant

Input Voltage	120/277V
Input Power	24W MAX.

EL770RICA

6" IC Airtight Remodel Housing

- Single wall IC Rated for use in insulated ceilings
- Housing with Quick Connect for easy insert/trim installation
- Meets restricted air flow requirements (per ASTM E-283)
- (4) Remodel clips secure housing
- Height allows for use in 2x8 construction
- Adjustable housings accommodates up to 1 1/4" ceiling thickness
- UL listed for damp location
- UL listed for wet location (with wet location inserts)
- UL listed for feed through
- UL listed for direct contact with insulation
- CA Title 24 compliant

Input Voltage	120/277V
Input Power	24W MAX.

6" LED Module & Driver with Reflector Trim

The perfect lighting solution for high-end residential projects with existing housings

TITLE 24 COMPLIANT

- Module includes LED Module Driver
- Frosted acrylic lens for even lumen distribution
- Life Span of 50,000 hours L70
- USA Designed and Assembled
- Limited 5 year warranty

Input Power	10.5W - 15.7W
Lumens	850 - 1250
Color Temp.	2700K - 4000K

Accessories

FIRECVR

Fire Cover

Recessed fire cover stops flame spread and heat transmission for up to 2 hours. UL rated. UL approved for most major ceiling types. Made of heat activated intumescent material. Measures 9 3/4" H x 17" O.D.

FIREENCL

Fire Enclosure

Flexible mica fire enclosure for recessed fixtures. ETL approved for 1-Hour fire resistance. Easy to install. To be used with Mica Fire Tape (sold separately) to seal the power feeding points. Meets the specifications of UL 263, ASTM E119. For use with Non - Fire rated housings. Bottom Opening: 20 3/8" L x 14 3/8" W - Top Measurement: 19 3/8" L x 13 3/8" W - Height: 9"

FIREENCL-S

Fire Enclosure

Flexible mica fire enclosure for recessed fixtures. ETL approved for 1-Hour fire resistance. Easy to install. To be used with Mica Fire Tape (sold separately) to seal the power feeding points. Meets the specifications of UL 263, ASTM E119. For use with Non - Fire rated housings. Bottom Opening: 16" L x 14 3/8" W - Top Measurement: 15" L x 13 3/8" W - Height: 7 1/4"

FIRETAPE

Mica Fire Tape

Fire proof mica adhesive tape helps seal the power feeding point on Fire Enclosure (FIREENCL). Offers outstanding high temperature and flame resistance, and provides excellent electrical insulating. Measures 3/4" W x 16' L

EADC1

Automatic Daylight Control (0-10V)

The automatic daylighting control sensor can be used as an effective approach to reduce electric lighting energy use by reducing electric lighting power in response to available daylight. The daylighting control sensor measures ambient lux levels and determines the amount of artificial light needed, then uses 0-10V signals to dim accordingly. For use with 0-10V frames.

KEM-LD1 (8W, Up to 750 lm Emergency Output)

KEM-LD2 (12W, Up to 1100 lm Emergency Output)

Emergency Battery Backup (Single Whip for J-Box Mounting)

Emergency battery backup. 90 minutes of emergency light. 120V/277V AC, 60Hz.

KEM-LD3 (8W, Up to 750 lm Emergency Output)

KEM-LD4 (12W, Up to 1100 lm Emergency Output)

Emergency Battery Backup (Double Whip)

Emergency battery backup. 90 minutes of emergency light. 120V/277V AC, 60Hz.

PSA-30

Socket Adapter

Socket adapter E26 to quick connector.

Trims Styles & Finishes

Find the perfect trim selection for any project from our wide selection of styles, color finishes and shapes.

The **Quality** Choice

The **Leading** Choice

The **Timely** Choice

The **Contractor's** Choice

The **Trusted** Choice

Over two and a half decades ago, in the heart of Los Angeles, ELCO Lighting was founded on the philosophy that high quality lighting products should be sold at a fair market price. Our commitment to this philosophy and dedication to exceptional customer service serve as the very soul of our company. We take pride in our perpetual commitment to such standards that enable

us to continually prosper in a highly competitive and unpredictable industry. With our expanding LED product line that entails recessed, track, undercabinet, outdoor and emergency lighting, we are ready to fulfill a variety of lighting demands. Quality engineering, fair market value, professional customer service, and micro-managed inventory are the cornerstones of ELCO Lighting.
